

Personal Opportunity Memo for Petr Andreev

Prepared on 2026-05-03

1. Executive message - the strongest path is clear

****Recommendation:**** your highest-leverage path is to double down on ****public technical authority in CPython/runtime/performance and Python education****, then use that authority to win either a high-fit DevRel/AI-infrastructure role or stronger speaking-led mobility.

****Main path summary:**** the best near-term opportunities are not degrees. They are a tight mix of ****conference CFPs**** and ****jobs that reward technical depth plus teaching/public speaking****.

****Side path summary:**** your best side path is ****agentic-AI/product visibility plus selective creative storytelling****, not broad hobby hunting.

****Biggest assumption:**** I am assuming you are willing to travel internationally for high-value talks and would prefer opportunities that do not depend on a fully documented academic profile.

****Immediate next action:**** submit ****one PyCon Taiwan talk****, ****one PyCon JP talk****, and ****one AGNTCon/MCPCon talk**** in the next 10 days, using the same core idea adapted to each audience.

2. Profile reading - the person is best positioned for a public technical-leadership trajectory

You are already unusually well-positioned for a hybrid track: ****deep Python/runtime expertise + teaching + mentoring + speaking + community building****. That combination is rarer than pure engineering strength and should be treated as your strategic edge.

****Strengths that matter most****

- Deep CPython, concurrency, performance, and systems curiosity.
- Strong lecture/workshop/mentoring profile.
- Real community-building behavior, not just technical output.
- High willingness to research, ship, and work globally.
- Current projects already connect Python, agents, automation,

and public knowledge systems.

Constraints that materially affect recommendations

- Citizenship, residence, and visa reality are not stated.
- Formal education history is missing.
- Current employment status and compensation target are missing.
- Public proof pack is implied, but links to talks/CV/GitHub/LinkedIn are not included in the profile file.

What this changes

- I am prioritizing **CFPs, roles, and mobility opportunities** over degrees, scholarships, or fellowships.
- I am favoring opportunities that reward **demonstrated expertise and public communication**, not credentials alone.
- I am treating **Asia-accessible and Europe-remote** options as more practical than US-only paths unless sponsorship is explicit.

3. Main path - the best move is to turn expertise into talks and selective role applications

Ranked main-path opportunities

Rank	Opportunity	Type	Fit (0-5)	Why fit	Value
Deadline / next intake	Geography	Materials	Effort / competitiveness	Action	Source
Confidence					
1	PyCon Taiwan 2026 CFP	Conference talk/tutorial CFP	5	Strong fit for CPython internals, performance, concurrency, community, and advanced Python education; advanced topics are explicitly welcome. Fastest way to add Asia speaking proof and repurpose existing runtime talks. CFP ends 2026-05-18 AoE . Taipei; in-person preferred, remote possible on request. Speaker profile + proposal abstract. Medium effort, high competition. Apply now. https://tw.pycon.org/en-us/speaking/cfp	High
2	PyCon JP 2026 CFP	Conference talk CFP	5	Exact match with Python Core/Ecosystem and Community/Education categories; English accepted; travel-grant option exists inside submission flow. Best pure-Python credibility play in Asia in the next 4 weeks. Submission ends 2026-05-31 AoE ; conference 2026-08-21 to 2026-08-23 . Hiroshima, Japan. Title, category,	

abstract, your own experience, discussion angle. | Medium effort, high competition. | ****Apply now.**** |
<https://pretalx.com/pyconjp2026/cfp> | High |
 | 3 | Developer Relations Engineer - EMEA @ Qdrant | Job | 5 |
 Combines Python/Rust depth, demos, public speaking, workshops, and AI-infrastructure credibility; the role is explicitly engineer + educator + community builder. | Highest-fit salaried role in the current set. | Open as of ****2026-05-03****. | Berlin / EMEA, remote-first. | Resume + public technical proof: talks, GitHub, writing. | High effort, high competition. | ****Apply now if EMEA-eligible.**** |
<https://jobs.ashbyhq.com/qdrant.tech/2849a629-df9f-4a77-a5bf-53af11dbeelb> | High |
 | 4 | All Systems Go! 2026 CFP | Conference CFP | 4.5 | Excellent venue for a talk on CPython performance, tracing, Linux runtime behavior, or systems-facing Python. | Expands your reputation beyond Python-only circles into serious systems audiences. | CFP closes ****2026-06-14****; event ****2026-09-30 to 2026-10-01****. | Berlin, Germany. | Proposal only. | Medium effort, medium-high competition. | ****Apply now.**** |
<https://cfp.all-systems-go.io/all-systems-go-2026/cfp> | High |
 | 5 | ML Systems Performance Engineer @ Cerebras Systems | Job | 4 |
 Strong match for performance modeling, debugging, tooling, and Python+C++ systems work; weaker on teaching/community, stronger on raw systems depth. | Highest-upside stretch into ML inference performance. | Open as of ****2026-05-03****. | Sunnyvale, CA or Toronto, Canada. | Resume + proof of benchmarking/perf work. | High effort, very competitive. | ****Apply if relocation is realistic.**** |
<https://job-boards.greenhouse.io/cerebrassystems/jobs/7599454003> | High |
 | 6 | Developer Relations Lead @ Pluralis Research | Job | 4 |
 Strong fit for translating dense research into talks, explainers, and community narratives; especially aligned with your agent/research communication style. | Good bridge from Python authority into frontier ML systems reputation. | Open as of ****2026-05-03****. | San Francisco; visa sponsorship/relocation support noted for exceptional US/Australia cases. | Resume + links to talks/writing + social/public footprint. | High effort, high competition. | ****Prepare targeted application; apply if research-facing DevRel is a real goal.**** |
<https://jobs.ashbyhq.com/pluralis-research/5524cad0-a500-4067-a189-064d0d03e591> | High |
 | 7 | Head of Developer Relations @ n8n | Job | 3.5 | Strong product fit with automation/AI/orchestration and large developer-

community exposure; weaker fit because it is a leadership role, not a pure technical IC role. | Good if you want product leverage and team leadership, not just technical authority. | Open as of ****2026-05-03****. | Remote, East Coast or Europe. | Resume + leadership proof + content/community portfolio. | High effort, high competition. | ****Apply only if you want to lead DevRel now.**** | <https://jobs.ashbyhq.com/n8n/a8aea5b5-bde5-491e-adc0-affde5b3af3d> | High |

Why this matters

The best main-path opportunities cluster around one conclusion: ****your edge is not It is ** That is why the top of the list is dominated by **CFPs with near deadlines**, followed by roles that explicitly reward teaching, demos, writing, and community presence.**

Pure ML/GPU performance roles are attractive, but they are stretch bets unless you can show recent public work in benchmarking, inference, kernels, or tooling. The DevRel/technical-education roles are more immediately monetizable because they match your current profile more directly.

30/60/90-day logic

****Next 30 days****

- Submit PyCon Taiwan, PyCon JP, AGNTCon Japan, AGNTCon Europe, and All Systems Go proposals from one shared talk inventory.
- Prepare one role application pack tailored to Qdrant first.
- Publish one short public artifact that proves current relevance: a blog post, benchmark note, or talk abstract around CPython performance, free-threading, or agent infrastructure.

****Next 60 days****

- Convert accepted or shortlisted proposals into polished slides plus one demo repository.
- Apply selectively to Qdrant plus one stretch role: Cerebras or Pluralis.
- Use every submitted talk abstract as a LinkedIn/GitHub/website proof asset instead of leaving it private.

****Next 90 days****

- Turn accepted talks into a repeatable workshop or consulting/teaching offer.
- Use conference visibility to strengthen role applications and sponsor/partner conversations for your own projects.
- Decide whether the next major bet is: CPython/public authority, AI infra role, or product-founder visibility.

4. Side path - the best compounding side path is agentic-AI visibility plus creative storytelling

Ranked side-path opportunities

Rank	Opportunity	Type	Fit (0-5)	Why fit hobby/interest
Value	Deadline / next intake	Geography	Materials	Effort
/ competitiveness	Action	Source	Confidence	
----	-----	----	-----	-----
-----	-----	-----	-----	-----
-----	-----	-----	-----	-----
1	AGNTCon + MCPCon Japan CFP	Agentic AI conference CFP		
4.5	Directly fits `op2u`, agent workflows, MCP, evaluation, orchestration, and human-agent systems; also matches your Asia mobility interest. Best side-path outlet for turning your current product work into recognized public technical work. CFP closes **2026-05-29**;	event **2026-09-10 to 2026-09-11**.		
	Tokyo, Japan. Sessionize proposal. Medium effort, medium-high competition. **Apply now.**			
	https://events.linuxfoundation.org/agntcon-mcpcon-japan/program/cfp/			
	High			
2	AGNTCon + MCPCon Europe CFP	Agentic AI conference CFP		
4.5	Same product/agent fit as Japan, with broader Europe-facing ecosystem visibility. Strongest non-Python public-growth path for `op2u` and your agent systems work. CFP closes **2026-06-08**;	event **2026-09-17 to 2026-09-18**.		
	Amsterdam, Netherlands. Sessionize proposal. Medium effort, medium-high competition. **Apply now.**			
	https://events.linuxfoundation.org/agntcon-mcpcon-europe/program/cfp/			
	High			
3	AOP Open 2026	Photography award / open call	3	Good fit if you can curate a coherent travel/culture/storytelling series from Asia; better for recognition than for income. Serious creative-branding play with judges, cash prizes, and exhibition exposure. Entries close **2026-06-08**.
	Global; UK-based award. Photo single/series/moving entry + fee. Medium effort, high competition. **Prepare only if you already have a real series.**			
	https://www.aopawards.com/aop-open-2026/			

| High |
| 4 | Umbra International Photography Awards 2026 | Photography
award | 2.5 | Useful only if you want a slower-burn public
storytelling lane and can build a stronger portfolio by late
summer. | International recognition upside, but weaker strategic
link to the core path than AOP. | Submissions end ****2026-09-30****.
| Global. | Portfolio submission; fee details not surfaced on
landing page. | Medium effort, high competition. | ****Monitor or
prepare later.**** | <https://www.umbrawards.com/> | Medium |

How the side path compounds the main path

The side path should not distract you from Python authority. It
should ****amplify it from adjacent angles****:

- agentic-AI conferences make `op2u` legible to a serious builder audience;
- photography/storytelling opportunities strengthen public identity and long-form observation skills;
- Asia-focused mobility opportunities let you compound geography, community, and narrative at the same time.

5. What to do now - sequence matters more than volume

Next 3 actions

1. Build a ****three-talk proposal kit**** around topics you already own:

- CPython/free-threading/performance;
- benchmarking Python systems correctly;
- agentic opportunity pipelines / MCP / human-in-the-loop automation.

2. Submit to ****PyCon Taiwan****, ****PyCon JP****, and ****AGNTCon Japan**** first because the deadlines are closest.

3. Build one ****public proof pack**** for job applications:

- short bio;
- one-page CV;
- GitHub links;
- talk list;
- 2 best slide decks or videos.

Next 30 days

- Submit All Systems Go and AGNTCon Europe after the first three CFPs.

- Apply to Qdrant immediately after the proof pack is ready.
- Decide whether Cerebras or Pluralis is your preferred stretch application; do not do both unless you can tailor each deeply.

What to prepare before applying

- One polished page.
- One canonical CV in English.
- One short portfolio page with talks, workshops, mentoring, and community work.
- One evidence-backed write-up on recent CPython/performance work.
- One version of your `op2u` story for agentic-AI audiences.

What you should clarify

- Citizenship and legal work/travel status.
- Whether you want a new full-time role in 2026 or only selective contract/visibility wins.
- Whether you are willing to relocate for a very high-upside role.
- Whether you already have a viable photography/travel-storytelling portfolio.
- Whether your main near-term objective is: salary, speaking reputation, CPython contribution, or product traction.

6. Appendix - the broader opportunity backlog is still useful

Track	Opportunity	Type	Fit summary	Key requirement
Deadline / timing	Funding / cost	Source	Confidence	
-----	-----	----	-----	-----
-----	-----	-----	-----	-----
Main path	PyCon AU 2026	Conference / monitor	Strong eventual fit for Python/community speaking, but the live site is mainly in ticket/roadmap mode rather than active CFP detail. Monitor CFP opening; block dates now. Conference **2026-08-26 to 2026-08-30**; roadmap signals CFP in Q2 2026. Tickets on sale. https://2026.pycon.org.au/ and https://2026.pycon.org.au/posts/2026-conference-roadmap/	Medium
Main path	EuroPython 2026 attend-only	Conference / networking	Very strong fit if self-funded; speaker CFP and finaid first round are already closed. Ticket purchase + self-funded travel if attending. **2026-07-13 to 2026-07-19**.	Ticket required; travel/accommodation not reimbursed for

speakers; financial aid page shows first round closed. |
<https://tickets.europython.eu/> and
<https://ep2026.europython.eu/finaid/> | Medium |
 | Main path | PyCon Singapore 2026 attend-only | Conference /
 networking | Good regional networking option from an Asia base,
 but the speaker CFP closed on May 1. | Attendance only unless
 another speaking route appears. | **2026-06-19 to 2026-06-21**. |
 Ticket/funding not surfaced in the page excerpt I reviewed. |
<https://pycon.sg/> | Medium |
 | Main path | Open Source Days 2026 CFP | Conference CFP | Only
 moderate fit, but relevant if you want to frame Python/AI tooling
 for digital content creation, imaging, or pipeline automation. |
 In-person presentation required. | CFP closes **2026-05-17**;
 event **2026-07-19**. | No speaker funding noted on CFP page. |
<https://events.linuxfoundation.org/open-source-days/program/cfp/>
 | High |
 | Side path | AGNTCon + MCPCon Europe attend-only | Conference /
 community | Good backup if the CFP is not ready in time; still
 useful for ecosystem mapping and partner discovery around `op2u`.
 | Registration. | Event **2026-09-17 to 2026-09-18**; early-bird
 registration available through **2026-08-02**. | Paid
 registration. | [https://events.linuxfoundation.org/agntcon-](https://events.linuxfoundation.org/agntcon-mcpcon-europe/)
[mcpcon-europe/](https://events.linuxfoundation.org/agntcon-mcpcon-europe/register/) and [https://events.linuxfoundation.org/agntcon-](https://events.linuxfoundation.org/agntcon-mcpcon-europe/register/)
[mcpcon-europe/register/](https://events.linuxfoundation.org/agntcon-mcpcon-europe/register/) | Medium |
 | Side path | AGNTCon + MCPCon Japan attend-only | Conference /
 community | Good Asia-based backup path for the same reason. |
 Registration. | Event **2026-09-10 to 2026-09-11**; early-bird
 through **2026-07-14**. | Paid registration. |
<https://events.linuxfoundation.org/agntcon-mcpcon-japan/> and
<https://events.linuxfoundation.org/mcp-dev-summit-tokyo/register/>
 | Medium |
 | Side path | Umbra Awards 2026 | Photography award | Worth
 keeping as a later creative-publicity option if you do not have a
 strong series ready by early June. | Portfolio submission. |
 2026-09-30. | Likely paid entry; landing page does not state
 fee in the section reviewed. | <https://www.umbrawards.com/> |
 Medium |

7. Appendix - source log and assumptions

Assumption log

Assumption	Why assumed	Impact on recommendations
-----	-----	-----
You can produce at least one strong English talk proposal		

quickly. | The profile shows lecturer/speaker history and advanced subject matter. | This drives the heavy CFP bias at the top of the report. |

| You prefer opportunities that do not depend on formal academic credentials. | Degree history is missing, but technical/public proof is strong. | I deprioritized degrees, scholarships, and formal fellowships. |

| Budget is not unlimited, so speaker grants and remote-friendly roles matter. | The profile asks for practical opportunity logic and global mobility. | I favored roles/CFPs with either remote options or travel-support hooks. |

| Asia remains strategically important. | The profile says Indonesia/Asia context matters and lists Korea/Japan/Singapore/Malaysia interest. | I gave extra weight to Japan, Taiwan, Singapore, and Tokyo-based opportunities. |

| You value public reputation as much as immediate salary. | Speaking, workshops, community, and product-building all rank highly in the profile. | I ranked high-signal speaking opportunities above lower-fit job applications. |

Source log

Claim or opportunity	Source	Date checked	Confidence
PyCon Taiwan 2026 CFP dates and format	https://tw.pycon.org/en-us/speaking/cfp	2026-05-03	High
